

EPIPHY

KOKUYO

Simplicity Through Design

The Epiphy flip top table is designed for elegance and ease of use. The flowing curves and graceful design make Epiphy the perfect choice for training, meetings and conferences.

Award Winning Design

Epiphy is designed to incorporate both ergonomics and style.

All components have their own distinct design and add to the sleek elegance of Epiphy.

As a result, this elegant flip top table has won design accolades including the IF Award and Good Design Award.

Conveying Comfort

The 2100 mm wide Epiphy can seat three people comfortably side by side, meaning that Epiphy is particularly suitable for training rooms.

Flexibly Matches Various Work Scenes

At its best in the training room, Epiphy can be easily reconfigured for group work. One table can fulfill multiple activities.

1. Ease of Use

The large easy to hold handles ensure that Epiphy tables are extremely reliable and easy to operate.

2. Cable Management

The large wiring duct which is supplied as standard can handle all of your power and data requirements. The duct can be accessed from either the front or rear and cables can be brought out at any point along the duct cover.

3. Height Adjustment

Large diameter castors and a levelling function (up to 10mm) enables stable placement and easy portability, even on uneven floors.

4. Parallel Stacking

For efficient storage, Epiphy can be stacked in parallel without diagonal slippage.
(Stack interval: 180mm)

5. Safe Secure Operation

The unique opening mechanism of the Epiphy prevents the possibility of trapped fingers.

With modesty panel
